PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning engineering student interested in Python development, AI-powered applications, automation, and developer tools. Building practical projects while continuing to strengthen programming and problem-solving skills.

EDUCATION

B.E. — Artificial Intelligence and Machine Learning
Vivekananda College of Engineering and Technology, Puttur · VTU
3rd Year / 5th Semester

PROJECTS

AI Resume Analyzer

AI-powered resume analysis project. Live demo · Source code.

Codebase Archaeologist

Python developer tool focused on examining Git history and codebase changes. Source code.

CodeAlpha Hangman

Python word-guessing game project. Source code.

Stock Portfolio Tracker

Python project for entering stock information and calculating portfolio values. Source code.

File Organizer

Python utility project focused on organizing files by type. Source code.

INTERNSHIP / PROJECT EXPERIENCE

CodeAlpha — Python Programming Internship
Project repositories associated with the internship include Hangman Game, Stock Portfolio Tracker, and File Organizer. Dates and formal completion status were not provided and are not claimed.

TECHNICAL SKILLS

Programming: Python
Tools: Git, GitHub
Project areas: AI-powered applications, resume analysis, Python automation, Git-history tooling
Additional learning: AI/ML, cloud computing, data structures and algorithms

CERTIFICATIONS

Certificate details have not yet been provided. Add verified certificate names and credential links before using this resume for applications.
